Call for Papers & Abstracts

Logistics Management 2019

September 18-20, 2019 in Halle/Saale (Germany)

We are pleased to invite you to participate in the 11th Logistics Management (LM 2019) conference of the Scientific Commission for Logistics (WK-LOG) of the German Academic Association for Business Research (VHB). The objective of the LM conferences is to provide a forum for participants from universities and related industries to present and discuss new ideas and technical developments related to the management of logistic systems.

The LM 2019 conference invites you to submit original research and application studies in all areas of logistics management. A special focus is put on **digitalization of supply chains** and **decarbonization in the transport industry**, but submissions are not limited to either fields. Submissions to the conference are received as **full papers** (15 pages max., including a short abstract and references) or as **extended abstracts** (2 pages max.). Conference languages are English and German.

All submissions are subject to a single blind peer review process based on standard criteria. Accepted submissions will be presented at the conference and accepted full papers will appear in the LM 2019 proceedings in addition. The conference proceedings are published by Springer as a volume of the **Lecture Notes in Logistics** series.
